

Urban Honolulu CDP Population Facts for July 1, 2019

The U.S. Census Bureau released its July 1, 2019 subcounty population estimates on May 21, 2020. These annual estimates cover all local governmental units, including incorporated places such as cities and towns.

Hawaii is the only state that has no incorporated places recognized by the U.S. Census Bureau. Through an agreement with the Bureau, Urban Honolulu Census Designated Place (CDP) is the only subcounty area in Hawaii for which the Bureau provides population estimates on an annual basis. Urban Honolulu CDP encompasses an area bordered by Nimitz Highway, Aliamanu Drive, the Koolau Ridge, Waialae Nui Stream and Waialae Nui Canal. Statistics for the Urban Honolulu CDP are below.

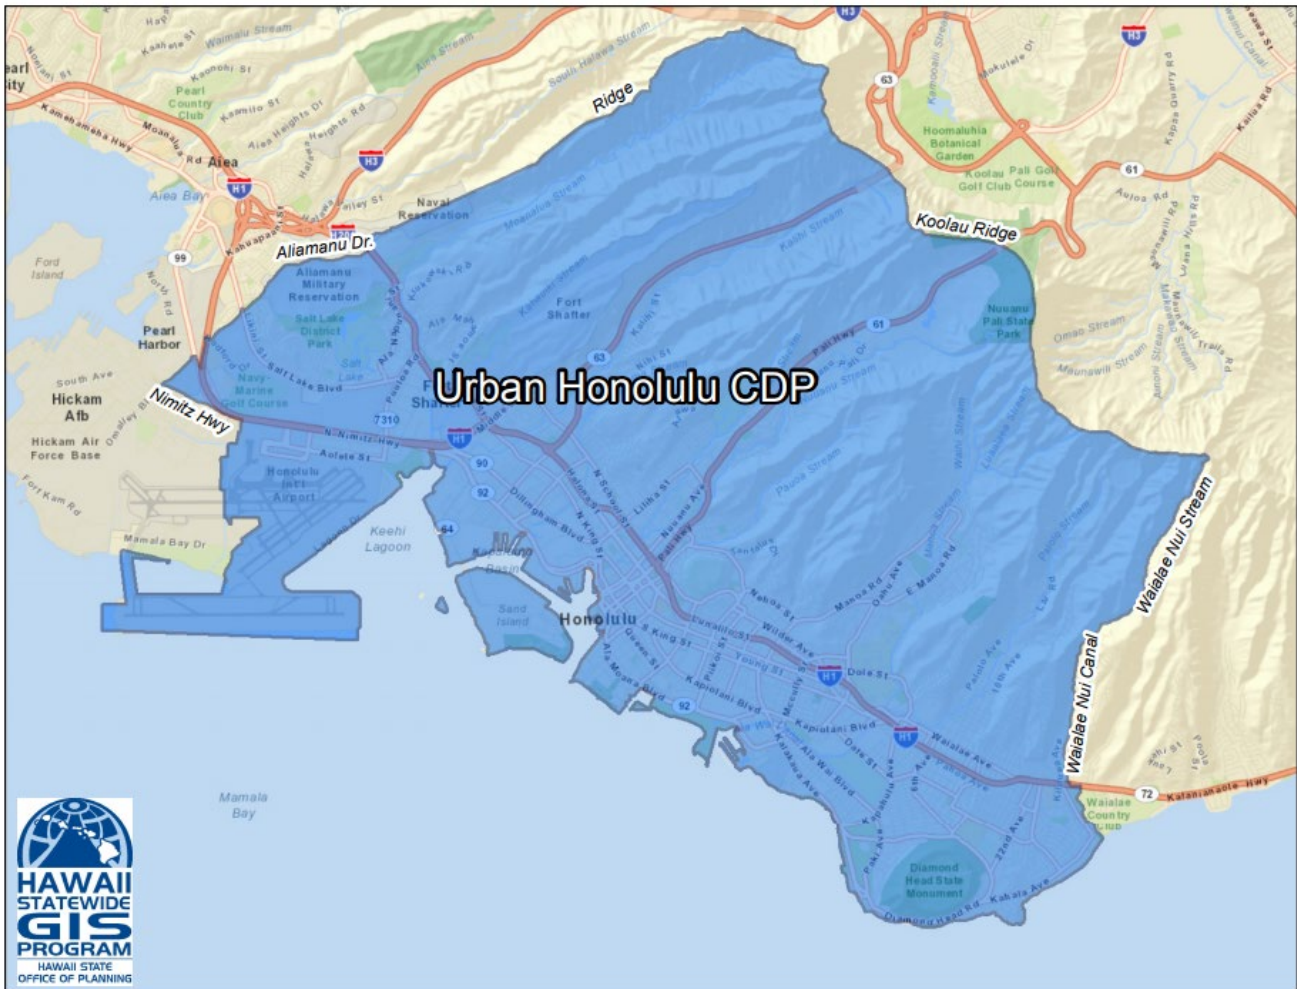

On July 1, 2019, the Urban Honolulu CDP had a population of 345,064. This was an increase of 7,343 (2.2%) from April 1, 2010. This growth was comparable to the rest of the City and County of Honolulu's growth, which also grew 2.2% between April 1, 2010 and July 1, 2019. However, growth in the City and County of Honolulu is much lower than the other counties (Hawaii County: 8.9%; Maui County: 8.1%; and Kauai County: 7.7%) and lower than the state overall (4.1%). Both the Urban Honolulu CDP and the rest of Honolulu have experienced a population decline since 2017.

Urban Honolulu CDP accounted for 35.4% of Oahu's population in 2019, with just under two-thirds of Oahu's population living outside of the Urban Honolulu CDP. Urban Honolulu's share of the population has remained static over time, varying between 35.4% to 35.5% of Oahu's population since 2010.

The Urban Honolulu CDP area ranked 56th in population among 780 incorporated places in the U.S. with a population of 50,000 or more in 2019. Urban Honolulu's ranking from April 1, 2010 was 53rd among 769 incorporated places with a population of 50,000 or more. Ranking is based on population size, with the largest being ranked first. New York City was the largest city in the U.S. with 8.3 million people, followed by Los Angeles with a population of 4.0 million, and Chicago with 2.7 million people. Houston (2.3 million) and Phoenix (1.7 million) rounded out the top five largest incorporated places.

Background Information

CDP stands for census-designated place. A CDP is an area identified by the U.S. Census Bureau for statistical purposes. CDPs are delineated for each decennial census as the statistical counterparts of incorporated places such as cities, towns, and villages. CDPs are communities that lack separate municipal government, but which otherwise physically resemble incorporated places. CDPs are delineated to provide data for settled concentrations of population that are identifiable by name but are not legally incorporated under the laws of the state in which they are located. The boundaries of a CDP have no legal status.

Maui County includes Kalawao County for analysis.
