

County Population Facts for the State of Hawaii: July 1, 2010 through July 1, 2018

The U.S. Census Bureau released population estimates at the county level on April 18, 2019. The release contained population data from 2010 to 2018.

The data include total county population and the components of population changes, but no details by age, sex, and race are available at this time.

Annual growth rate

The state population grew at an annual rate of 0.5% on average between July 1, 2010 and July 1, 2018, with two years of negative growth in 2017 and 2018. The statewide negative population growths in 2017 and 2018 attributed to the negative growth in the Honolulu County due to out-migration of people leaving for the U.S. mainland. The average annual population growth of the Honolulu County was 0.3% between July 1, 2010 and July 1, 2018. Growth rates for the neighbor island counties were around 1.0% per year during the period. While growth has slowed in all counties in recent year, growth has remained strongest year-over-year in Hawaii County.

Components of change

The average number of births in the state was 18,456 per year, and the average number of deaths was 11,029 per year. The result was an average natural increase of 7,427 persons per year between July 1, 2010 and July 1, 2018.

There was an average of 6,633 net in-migrants coming to the state from foreign countries during this same time period, and there was an average of 6,905 net out-migrants leaving the state for the U.S. mainland. The result was an average net loss of 272 people a year from migration between July 1, 2010 and July 1, 2018

Births by county

The City and County of Honolulu accounted for 71.7% of births in the state between July 1, 2010 and July 1, 2018. Hawaii County accounted for 12.9%; Maui County accounted for 10.6%; and Kauai County accounted for 4.7% between July 1, 2010 and July 1, 2018.

Deaths by county

The City and County of Honolulu accounted for 69.1% of deaths in the state between July 1, 2010 and July 1, 2018. Hawaii County accounted for 15.1%; Maui County accounted for 10.5%; and Kauai County accounted for 5.3% between July 1, 2010 and July 1, 2018.

Net migration by county

Between July 1, 2010 and July 1, 2018, there was a net average of 7,706 people moving to the U.S. mainland per year from the City and County of Honolulu. Per year, there was a net average of 5,129 people moving to the City and County of Honolulu from foreign countries. Thus, the City and County of Honolulu had an average net loss of 2,577 people per year during the July 1, 2010 to July 1, 2018 period. The neighbor island counties had net in-migration from both the U.S. mainland and from foreign countries between July 1, 2010 and July 1, 2018.

Maui County includes Kalawao County for analysis.
